Jakarta, Indonesia

A dedicated Front-End Web Developer with over 5 years of experience in developing and implementing interactive web applications. Extensive expertise in building large-scale web events and gamification features, specifically within the gaming industry. Proficient in using React.js and other modern technologies to create engaging and responsive user experiences. Eager to contribute to digital growth and product innovation.

Work Experiences

PT. Garena Indonesia - Jakarta, Indonesia

Feb 2019 - Present

Associate Front End Web Developer

Garena Indonesia is the Indonesian branch of Garena, a leading online games developer and publisher headquartered in Singapore. As part of Sea Limited, a global consumer internet company, Garena specializes in providing digital entertainment to millions of users across Southeast Asia, Taiwan, and Hong Kong, Middle East, North America, and South America.

- Fully responsible for the development and implementation of web events and gamification for major game titles such as Free Fire, AOV, and others.
- Built user interfaces (UI) and client-side logic using React.js, Redux, and JavaScript (ES6+) to create seamless interactive experiences.
- Collaborated with back-end developers, designers, and product managers to translate wireframes and mockups into functional, efficient code.
- Optimized the performance and loading speed of web events to ensure fast and stable access for millions of players.
- Implemented web development best practices, including clean code, version control with Git, and responsive design for various devices (desktop, mobile).

PT. Garena Indonesia - Jakarta, Indonesia

Aug 2018 - Jan 2019

Internship Front End Web Developer

- Supported the development team in testing and debugging existing web events.
- Assisted in the development of simple UI components and static web pages using HTML and CSS.
- Learned and applied the fundamentals of React.js under the guidance of senior team members.
